

Wired Remote Controller WDC-120G/WK

Features

- ❖ Temperature setting with 0.5°C or 1°C steps
- ❖ Dual temperature set points
- ❖ 7-speed fan control
- ❖ 5-step swing louver setting
- ❖ Address setting
- ❖ Follow me
- ❖ Eco mode
- ❖ Room temperature display
- ❖ °F/°C display
- ❖ Keyboard lock
- ❖ Daily timer
- ❖ Weekly schedule timer
- ❖ Auto restart
- ❖ 2 permission levels
- ❖ Bi-directional communication
- ❖ Group control
- ❖ Main or secondary controller setting
- ❖ Display shut-off
- ❖ Night silent mode
- ❖ Remote signal receiver
- ❖ Clean filter reminder
- ❖ Extension function
- ❖ Daylight saving time
- ❖ Clock display
- ❖ Dot matrix display
- ❖ Error check function
- ❖ System parameter querying
- ❖ System setting control

Group Control

One controller can be used to unify the settings across up to 16 indoor units.

Main or Secondary Controller Setting

Two controllers can be used together with single indoor units. Operating mode and settings would be set according to the most recent instruction received. The controller display screens are synchronized so that both displays update when a setting is adjusted.

Bi-directional Communication

The wired controller can query the system operating parameters thanks to the new bi-directional communication functionality. In addition, settings including static pressure, cold draft prevention and temperature compensation can be configured on the wired controller.

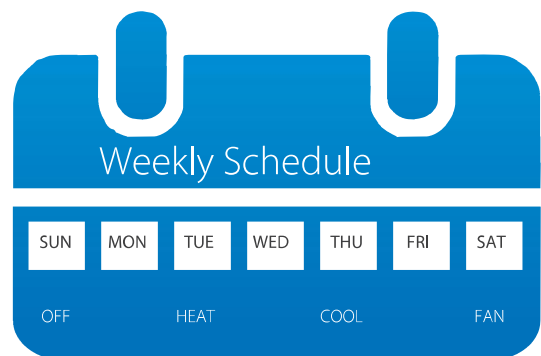

2 Permission Levels

2 permission levels ensure users can easily access control functions and allow administrators convenient access to operating parameters.

Weekly Schedule Timer

The weekly schedule timer allows users to set multiple schedules each with its own operating mode, temperature settings and fan speeds.
